Hiring Manager
Oracle

Dear Hiring Manager,

I am excited to apply for the Principal Product Experience Designer position at Oracle. With over 30 years of experience in UX and UI design, I am passionate about leveraging my skills to transform the construction industry and drive innovation through Oracle's Smart Construction Platform.

My extensive background in designing user-friendly, responsive, and transactional products aligns perfectly with the needs of this role. At HamiltonBerchman, I led the design of over 1,000 successful projects, ensuring they adhered to best practices and accessibility standards. My ability to conduct thorough user research and usability testing has consistently informed my design decisions, resulting in enhanced user experiences and higher engagement rates.

One of my proudest achievements was reducing onboarding steps from 19 to 6 at Hatch Early Learning Inc., significantly improving user experience and engagement. I am adept at collaborating with cross-functional teams, as demonstrated by my work at Art+Logic Inc., where I led a \$2M auctioneering software refactor project and delivered high-quality prototypes and designs in an Agile environment as Lead Designer.

I am deeply inspired by Oracle's commitment to diversity and innovation, as evidenced by your global team of over 1,000 designers and the prestigious awards for the Redwood Design System, which aligns with my values. I am eager to bring my expertise to Oracle and contribute to creating the best application experiences.

I am excited about the opportunity to contribute to Oracle's transformative projects. The company's investment in employee growth and work-life balance is incredibly appealing. I am thrilled at the prospect of joining your tight-knit, diverse team and making a significant impact.

Thank you for considering my application. I look forward to discussing how my background, skills, and passion for design can contribute to Oracle's continued success and innovation.

Cheers,
J. Bert Mahoney
