Sharing ECHO work with Anne.

Discount it at the project level.

- estimate how much longer would it take you to do it another way?
- how much padding/learning that you need in terms of hours?
- take it to Angel and ask her to do the discount

OKR's — Objective's and Key Results

A+L's case, OKR's are defined for quarterly objectives.

Design Group has quarterly objectives.

Objective #2: Refining and developing UI/UX Services Offering

1. KR: Create three Design-oriented Case Studies for our web site
2. KR: Provide two quarterly blog posts from Design Group
3. KR: Coordinate Design/Sales meeting supporting case studies

Designed to help Sales better speak to UI/UX capabilities for A+L

How can we write to support this?

ADA compliance.

If we can get a blog post about this, talking about multiple projects where this took place. Talk about the testing aspect of it.

- Discovery and Analysis
- Solutions
- Testing

TDF example—depending on your disability it would show you options that meet

Have more than one person contribute to each article.

Have a primary writer for each article, but pass it around to have others contribute their areas of expertise.

Don't focus on case studies for now.

Focus on blog posts.

Designing for Better Medicine (blog post - Laura)

Daisey is going to lead the design team.

She wants to create ways to work together.

What can we share on the website?

Free resources to share?

Design Group Meeting - 8/7

OKR's and Blog posts.

Daisey needs to check to see who is doing what.

- I can send her what I should be doing

--

Daisey wants to supply what sales people need to help them sell.

- Dashboard (Bert)
- Role Administration (showing examples for how things look different) (Anne)
- Spreadsheet conversion (projects that were once spreadsheets) (Daisey)

Design Tools that Designers Use

Types of Social Cards—Purpose Driven

- Educational/Informational
- Historical
- Technological
- Event-Based
- Recruitment / Hiring
-

Tag them based on what they are.

Need to develop tags.

Writing Blog Posts?

Portfolio Bits?

Focus on the portfolio bits.

- SAA - Dashboards

Make it as generic as possible

Focus on content rather than who we did it for.

Page about dashboards.

- what we can do with dashboards
- how do they help?
- widgets display
- whats the purpose?
- Anything that sparks ideas and they can see themselves in it
- Inviting
- Educational

Put into a word doc and we can work on it from there.

Process
Procedure
Document

We need to have a plan to unload this on Ed/QA, etc.

AA is the baseline standard.

- it's a handful of things beyond the basics "A"
- present a strategy to the group

Development is where the gap is.

Build an "accessibility first design system"

This is how we do forms, etc.

Dribbble

Art+Logic now has a 'pro' account.

Think of creative ways to present the portfolio.

- think about ways we can present them

Something on the path to get us to a case study for AIS that illustrates UI/UX competence in terms of solving the business problems.

Each person will be bringing their own answers to the table.

It will help develop a common understanding so that we can roll these out going forward.

Design Group Meeting—3/27
