Dear Hiring Manager,

I am incredibly excited to apply for the Senior UI/UX Human Centered Designer role at General Dynamics Information Technology in support of the Food and Drug Administration's critical mission needs. With over 28 years of experience as an award-winning Lead Digital Experience Designer, including 5+ years of experience in User Experience (UX) Design, I am confident in my ability to make an immediate and valuable impact on your team.

As a dedicated and passionate designer, I am drawn to this opportunity because it aligns perfectly with my skills and aspirations. Having worked on a variety of successful digital projects, including websites, mobile and desktop applications, and marketing initiatives, I am eager to use my expertise in problem-solving and design systems to contribute to your team's success.

In addition, with my prior experience as a Senior User Experience Designer at Hatch Early Learning Inc., I streamlined user interaction, resulting in improved product functionality and user experience. I also developed a comprehensive design system and suite of user personas, leading to a more targeted and efficient redesign of their onboarding process. Further, my proficiency in delivering high-quality outputs, conducting remote meetings, and presenting to global executives and clients make me a valuable asset to your team.

I am confident that my skills and experience make me an ideal candidate for this position and I am eager to discuss my qualifications further. Thank you for considering my application.

Sincerely,
Joseph Mahoney
