

DiskWarrior has successfully built a new optimized directory for the disk named "TwoTerabytes." The new directory is ready to replace the original directory.

All file and folder data was easily located.

Comparison of the original and replacement directories could not be performed because the original directory was too severely damaged. It is recommended that you preview the replacement directory.

- Errors, if any, in the directory structure such as tree depth, header node, map nodes, node size, node counts, node links, indexes and more have been repaired.

- 1 folder had a directory entry with an incorrect custom icon flag that was repaired.

Disk Information:

Files: 1,865,704

Folders: 508,766

Free Space: 286.44 GB
